## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of species 21 and claims 1-6, 8-14, 17-23 in the reply filed on 9/25/08 is acknowledged. The traversal is on the ground(s) that basic modifications do not present a burdensome search. This is not found persuasive because each of these modifications will require separate detailed searches that are an undue burden.

The requirement is still deemed proper and is therefore made FINAL.

Upon further review claims 2, 6-8, 10-16, and 18-23 are withdrawn for being directed toward nonelected species.

Claim 2 is directed to piston component which is shown figure 45a represented by species 24.

Claims 6 is directed to endplates which is shown figure 3 represented by species 2.

Claim 8 is directed to hip replacement which is shown figure 3 represented by species 2.

Claim 10 is directed to rate of the fluid being expelled and returned which is described in relation to figure 26 represented by species 12.

Claim 11 is directed to spring components which is shown figure 24 represented by species 11.

Claim 12 is directed to a membrane which is shown figure 43b represented by species 22.

Claim 13 is directed to multiple bodies connected with multiple reservoirs which is shown figures 11-15 represented by species 7.

Claim 14 is directed to wheel component which is shown figure 1 represented by species 1.

Claims 18-23 are directed to biological constituents incorporated into an extra cellular matrix which is shown described and shown in relation to figure 48 represented by species 26.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5, 9, and 17 rejected under 35 U.S.C. 102 (b) as being anticipated by Ray et al. USPN 4,772,287.

Ray discloses the same invention being a prosthetic disc implant comprising a body 12 containing a first reservoir 20 connected to a second reservoir 24 by a member 22a that allows a fluid to flow between the two reservoirs. Ray further discloses that the fluid may comprise numerous materials including water and oils.
